ती ठाउँका मानिसहरू कतै जान

तर, जीटीए प्रमुख कार्यपाल अनित

### IPHIs at two Chhattisgarh hospitals get national quality certification

PRESS TRUST OF INDIA

RAIPUR, NOV 20: Integrated public health labs (IPHL) at two district hospitals in Chhattisgarh have been awarded quality certification under the Union government's National Quality Assurance Standards (NQAS), an official here said on Thursday.

The IPHL at Pandri district hospital in Raipur has been recognised as the first quality-certified IPHL in the country, while the one in Balodabazar district hospital has also received certification, said Dr Priyanka Shukla, commissioner-cum-director of the state's Health Services. This milestone underlines Chhattisgarh's rapid growth in expanding scientific, reliable, and high-quality diagnostic services across its public health network, she said.

Chief Minister Vishnu Deo Sai and Health Minister Shyam Bihari Jaiswal have congratulated doctors, technicians, and staff of the IPHLs for the achievement. Sai, in a statement, said that the achievement reflects the rapid, scientific, and structural reforms underway in Chhattisgarh's health system. "Quality healthcare is our government's highest priority, and this national certification has strengthened the credibility and resilience of our public health services," he said.

According to a release, between January 2024 and November 2025, 832 health institutions across Chhattisgarh have undergone rigorous assessment and certification on national parameters, covering even the most remote regions, such as Chintaga in Sukma. The certification followed detailed evaluations carried out by expert assessors nominated by the Union Ministry of Health and Family Welfare. The Pandri and Balodabazar IPHLs were evaluated in September, during which teams conducted comprehensive reviews covering patient-centric services, quality control measures, workflow efficiency, safety protocols, documentation, and timely reporting, it said. ### NIT Rourkela secures patent for India's first autonomous drone system for real-time land mapping

PRESS TRUST OF INDIA

NEW DELHI, NOV 20: Researchers from the National Institute of Technology, Rourkela, have secured a patent for "BHU-MANACHITRA", an autonomous real-time land mapping drone system, officials said.

The developed system uses Artificial Intelligence (AI) and Unmanned Aerial Vehicle (UAV) technology to automatically generate land maps without requiring internet connectivity, external computers or manual interventions, they added.

Used to identify farmlands, forests, vegetation, and urban areas, land mapping is essential for the geographic governance of any country. It serves as the basis for planning, infrastructure development, natural resource management, and environmental monitoring.

In India, land mapping relies heavily on manual surveys, which often take weeks or months to produce usable maps.

In recent times, drones have been adopted to image distant terrains. However, the captured images still need lab processing, a time-consuming process, to get a readable map.

According to Sambit Bakshi, Associate Professor, Department of Computer Science and Engineering, while the government agencies can apply the innovation to land record modernisation, urban planning and smart-city development, Agriculture departments can instantly assess crop conditions, soil health and irrigation needs, improving both productivity and sustainability.

Moreover, this system may also help in the Digital India Land Records Modernisation Programme (DIHRMP), launched by the Government of India in 2018, which aims to digitise cadastral maps to create a modernized and integrated land record system.

The researchers explained that during natural disasters such as floods, landslides, and earthquakes, the system can provide immediate terrain information, helping authorities plan quicker and more effective responses.

Environmental and forest departments can use it to monitor deforestation, encroachments, and changes in biodiversity.

A lightweight AI model with as few as 2.48 million parameters, used in BHU-MANACHITRA, makes it suitable for on-board processing, Bakshi said.

Drones, by their design, cannot carry heavy dedicated hardware for real-time image processing, but can carry a tiny processor for executing this lightweight AI model that performs land mapping, he said.

The innovation opens new possibilities for faster decision-making, efficient resource management, and stronger disaster resilience.

With its potential use in a diverse range of sectors, MANACHITRA can play a pivotal role in enhancing national infrastructure, supporting field-level operations, and enabling more responsive, informed decision-making across the country," he added.

### Anti-Naxal operations: ITBP's Chhattisgarh unit gets best battalion award

PRESS TRUST OF INDIA

DISHA, NOV 20: An ITBP battalion deployed in Chhattisgarh, which killed two senior Naxal commanders and initiated welfare schemes to engage with locals in line with the Centre's anti-Naxalism by March 2025, was adjudged the best anti-Naxal operations unit of the force on Thursday.

The 27th Indo-Tibetan Border Police (ITBP) battalion is based in the Mohla Manpur Ambargarh Chowki district of Chhattisgarh, adjoining Maharashtra's Gadchiroli district. It was recognised for eliminating two senior Naxal commanders - state zonal committee member Vijay Reddy and Rajnandgaon District Border (DB) division secretary Lokesh Salame - during a fierce encounter that took place in August this year.

The battalion, over the last two years, also led operations that resulted in the killing of nine top Maoist leaders of the area, apart from arrests and surrenders of many cadres and overground workers. ITBP Director General Praveen Kumar handed over the coveted trophy and citation to the outgoing commander of the 27th battalion, Vivek Kumar Pandey, and the new Commander B.P. Badaya at a ceremonial event held here, officials said.

An official citation read out during the DC parade event said the battalion undertook "extraordinary" anti-Naxal operations and achieved "unprecedented" successes in Chhattisgarh.

The ITBP is holding its 64th Raising Day parade on November 23 here, and Union Minister of State for Home Affairs Bandi Sanjay Kumar is expected to officiate the event as the chief guest, according to officials. The force was raised in the aftermath of the 1962 Chinese aggression, and it is primarily tasked with guarding the 3,488-km 1016g Indo-China Line of Actual Control (LAC), apart from undertaking other internal security duties, including operations against Maoists. The best ITBP unit Naxal operations trophy assumes significance this time as all central and state police forces are working in tandem to neutralise or get the surrender of the extremists from the hills. This time from the Chhattisgarh and its bordering areas remain the main thrust areas in this context.

The Union government has asked the security forces to undertake the time-lapsed two-pronged approach to the Naxal menace, which includes undertaking intelligence-based armed offensives and conducting welfare works for the locals and tribes inhabiting these areas. The 27th battalion also undertook career counselling sessions to train the local youth in the Anandhi area, and at least 10 of them cleared the SSC and the Chhattisgarh Police constable exams.
